What is EdamNMN™?

EdamNMN™ (Young Bean) Extract, Containing All-Natural 5% NMN, is for Energy and Neuroprotection. NMN is Nicotinamide Mononucleotide.

EdamNMN™ is an All-Natural Source of concentrated NMN. Edamame (*Glycine max*), also known as Young Beans, is already famous for its Nutritional Profile and great source of protein, fiber, vitamins, and minerals. All natural NMN is potent and concentrated in Edamame (Young Bean) Extract.

About Vesta's EdamNMN™

NMN is a significant metabolic compound due to its anti-aging properties and as a precursor to NAD+ (Nicotinamide Adenine Dinucleotide). NAD+ is a vital coenzyme involved in DNA Damage and Repair and in mitochondrial support.

EdamNMN™ is a complete protein source and the only vegetable that contains all nine essential amino acids! EdamNMN™ (pronounced eh-dah-MAH-may) is the name for the young, green soybeans picked early in the green pod stage before the beans harden. EdamNMN™ is the food prepared with immature soybeans in the pod, and the dried bean form is used for making tofu and other soy products.

NMN Supplementation is vital to replace since NMN and NAD+ levels decline with age, leading to accelerated aging and decline, including the development of age-related diseases.

Benefits of EdamNMN™

- Anti-Aging Properties
- Enhanced Energy Metabolism
- Neuroprotection
- Cardiovascular Health
- Anti-Inflammatory Effects
- Metabolic Health
