

Advancing Cardiometabolic Health: Natural Solutions for a New Era of Weight Loss!

The approval of GLP-1 Modulators has led to an increasing interest

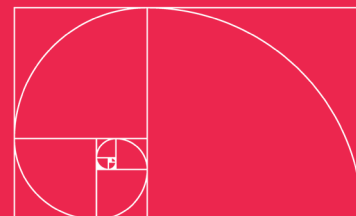

in Weight Loss for Cardio-Metabolic health. While the goal is to maintain healthy blood sugar and cholesterol levels, the side effects often include muscle loss, lack of energy, sarcopenia and atrophy. As consumers become more proactive about their health, Vesta Ingredients provides Cardiometabolic ingredients with scientifically backed and natural solutions. These ingredients target cardiovascular and metabolic wellness, offering support for heart health, blood pressure regulation, and glucose metabolism. In addition, Vesta features ingredients for GLP-1 Side Effects to ameliorate gastrointestinal issues and muscle loss.

Vesta Nutra, a trusted leader in the nutraceutical industry, offers a range of high-quality Cardiometabolic ingredients designed to meet the evolving needs of both consumers and manufacturers. With a commitment to innovation and scientific validation, Vesta Nutra ensures that its ingredients are backed by rigorous research and meet stringent quality standards. From powerful antioxidants to plant-based extracts, their portfolio includes solutions aimed at reducing oxidative stress, enhancing circulation, and supporting healthy lipid profiles. Through partnerships with leading research institutions, Vesta Nutra continues to advance the science behind Cardiometabolic health, delivering results that consumers can trust.

Vesta Ingredients, Inc.

CactOLean™

CactOLean™ is a natural Dragon Fruit extract designed to support weight loss through appetite modulation, thermogenesis, and lipolysis. It contains Tyramine and N-Methyl Tyramine, which promote fat breakdown, regulate blood sugar, and enhance metabolism. With powerful antioxidant properties, CactOLean™ helps reduce LDL cholesterol, supports heart health, and improves overall metabolic function. Its diuretic effects aid in minimizing water retention, while also contributing to a feeling of fullness and satisfaction.

BerbOLean™

BerbOLean™ is extracted from the Berberine Berberis species, and is a bioactive compound known for metabolic and cardiovascular benefits.

Berberine supports blood sugar control, cholesterol management, and weight loss by activating AMP-activated protein kinase (AMPK), which regulates metabolism and energy balance. Additionally, Berberine reduces inflammation, lowers LDL cholesterol, and may reduce the risk of heart disease. The BerbOLean™ natural antioxidant properties further promote metabolic health, making it a valuable option for managing conditions like diabetes and metabolic syndrome.

EriOLean™

EriOLean™ is a natural citrus extract standardized for 70% Eriocitrin, a powerful flavonoid derived from lemons. It supports healthy blood sugar levels, cardiovascular health, and weight management by naturally boosting GLP-1 levels and promoting insulin sensitivity. With antioxidant and anti-inflammatory properties, EriOLean™ helps reduce oxidative stress, supports a balanced inflammation response, and enhances lipid profiles. Ideal for those seeking metabolic and cardiovascular support, it provides the benefits of citrus flavonoids without the need to consume whole citrus peels.

MorOLean™

MorOLean™ is a natural weight management solution derived from Moro blood oranges (Citrus sinensis, Moro variety). MorOLean™ supports fat reduction, enhances metabolic health, and provides powerful antioxidant protection with its rich anthocyanin content. By promoting lipid metabolism and balancing blood sugar levels, MorOLean™ improves glycemic control. It stimulates GLP-1 secretion for glucose homeostasis. Studies show that Moro Orange Extract reduced body fat, triglycerides, and waist circumference.

BUCKTHORN STEM CELL BOOST™

Buckthorn Stem Cell Boost™ for regeneration and immunity, is a standardized Sea Buckthorn extract that supports stem cell mobilization enhancing immunity, tissue repair, and anti-aging.

Rich in polyphenols, proanthocyanidins, and bioflavonoids, it offers antioxidant protection and promotes cellular recovery. Traditionally used in Tibetan and Chinese medicine, Sea Buckthorn supports cardiovascular, metabolic, and skin health while reducing inflammation. Buckthorn Stem Cell Boost™ may also aid in managing GLP-1 side effects, making it a comprehensive supplement for longevity and overall wellness.

GPT Muscle Builder™

GPT Muscle Builder™ (GeroProtector Trigonelline) is a natural botanical extract from fenugreek that supports muscle growth, recovery, and energy production as an NAD+ precursor. It enhances exercise capacity, reduces fatigue, and aids in healthy aging by maintaining muscle mass. Additionally, it supports cognitive health, blood sugar regulation, and cardiovascular function. With antioxidant and anti-inflammatory properties, GPT Muscle Builder™ is beneficial for geriatric muscle regrowth, metabolic health, and managing GLP-1 side effects.
